may be said without the slightest judgment of the players in making him the captain.

At the same time the election of Withington is unique in the annals of Harvard or of intercollegiate football, for that matter. No captain of a big college eleven ever rose to such prominence in so brief a time; none was probably ever elected with so little actual football experience. As a freshman Lothrop Withington, Jr., played no football. A year ago, as a sophomore, he was not a candidate for the varsity. When the call for men was issued last September Withington was not among those who appeared on Soldiers' Field. On the contrary, he was wrapped up in rowing and had made his plans to take part in the usual rowing practice, for he had rowed in the varsity eight-cared race at New London last July, and the year before was one of the strongest oars in his freshmen crew.

But none too many promising men appeared as candidates for the line positions at Harvard this year, and some of the athletic leaders, realizing that Withington was ideally built for football, induced him to try the game. Among the number who sought and who did persuade him was his own brother, Paul, next to whom, as events so happened, he played in the line. Although the oraw captain threatened to bar him from the eight if he played feall, Withington put on a football suit and went out. football instead of rowed during the fail, Withington put on a football suit and went out. Naturally versatile and bright—both of the Withington boys stand high in their classes as well as in athletics—Lothrop Withington developed surprisingly rapidly. By sheer merit he worked his way into the first line-up and he played there in all the rames
